EXECUTIVE SUMMARY

Final-year B.Tech student in Artificial Intelligence at Karunya Institute of Technology and Sciences, with hands-on experience building AI systems, and AI based Projects. Skilled in Python, machine learning, and web-stack development. Passionate about cybersecurity actively seeking an internship to apply and deepen practical expertise.

EDUCATION

B.Tech Computer Science Engineering(Specialization in Artificial Intelligence) - 7.5 CGPA 2023 - 2027

Karunya Institute of Technology and Sciences

Higher Secondary (HSC) - 86.67%

2023

Belfield Matriculation Higher Secondary School

EXPERIENCE

May 2024

Networking Intern

Cisco

Completed Cisco Networking Essentials programme covering TCP/IP, subnetting, routing, and network security fundamentals.

PROJECTS

JERICHO — File-Level Security & Malware Detection System

Developed an malware behavior detection engine entropy-based feature extraction (C-first architecture).

NutriSnap — Edge AI Food Recognition App (Android)

Built an offline Android app using EfficientNet-Lite0 (TFLite INT8) trained on Food-101 to classify food and estimate nutrition from camera .Used Efficient Net For Model Building.Acheived 90% Accuracy

Cybersecurity Chatbot:

Conversational AI tool providing security guidance, threat awareness, and best practices

SKILLS

- Python
- Machine Learning
- CyberSecurity
- Self-directed learning
- DevOps
- Networking
- Leadership
- Communication

ACHIEVEMENTS

- Participated in Smart India Hackathon and Won in College Level
- Worked Under Karunya Hacks and was part of the Cyber Club
